

## How to install a doorbell?

To install the Doorbell first;

1. Check all the components in the box
2. Connect the 'U' shaped wires to each of the terminals on the back of the doorbell
3. Connect one of the loose ends of the 'U' shaped connectors to the chime and the other loose end of the 'U' shaped connector to the transformer
4. Power on the circuit breaker
5. Once the Doorbell is powered on, open the EZVIZ app and scan the QR code and add it to your EZVIZ account
